

XE-A113

FOCUS ON THE XE-A113

Sharp presents the compact, easy-to-use XE-A113.

- Help function printed on receipt
- Fast, quiet thermal printing
- Slim, lockable cash drawer
- Compact and attractive cabinet

SHARP

XE-A113

The Sharp XE-A113 electronic cash register is compact, fast and very simple to use, no matter what the application.

This self-contained, multi-purpose machine features a 'drop-in roll' thermal printer that produces around 12 lines per second. Not only is this much faster than a conventional printer, it is also a lot quieter and helps you to communicate a professional image to your customers at all times.

Easy to maintain, the printer uses wide thermal paper so your receipts carry all the information your customers require. With an electronic journal storing up to 2,600 lines of data for your records, there is no need for two-ply paper.

There are 20 departments on the keyboard and a maximum of 200 PLUs as standard on this compact, attractive terminal that is designed with typical Sharp thoroughness for greater ease of use and efficiency.

A pop-up customer display has large, bright LED segments that clearly show all the transaction data to your customers at the point of purchase.

And to complete the stunning picture, the XE-A113 has a slim, secure drawer for maximum security.
